**Common European Green Deal
data space to provide more
accessible and exploitable
environmental observation data
in support of the European Green
Deal priority actions**

Opening date: 22 June 2021

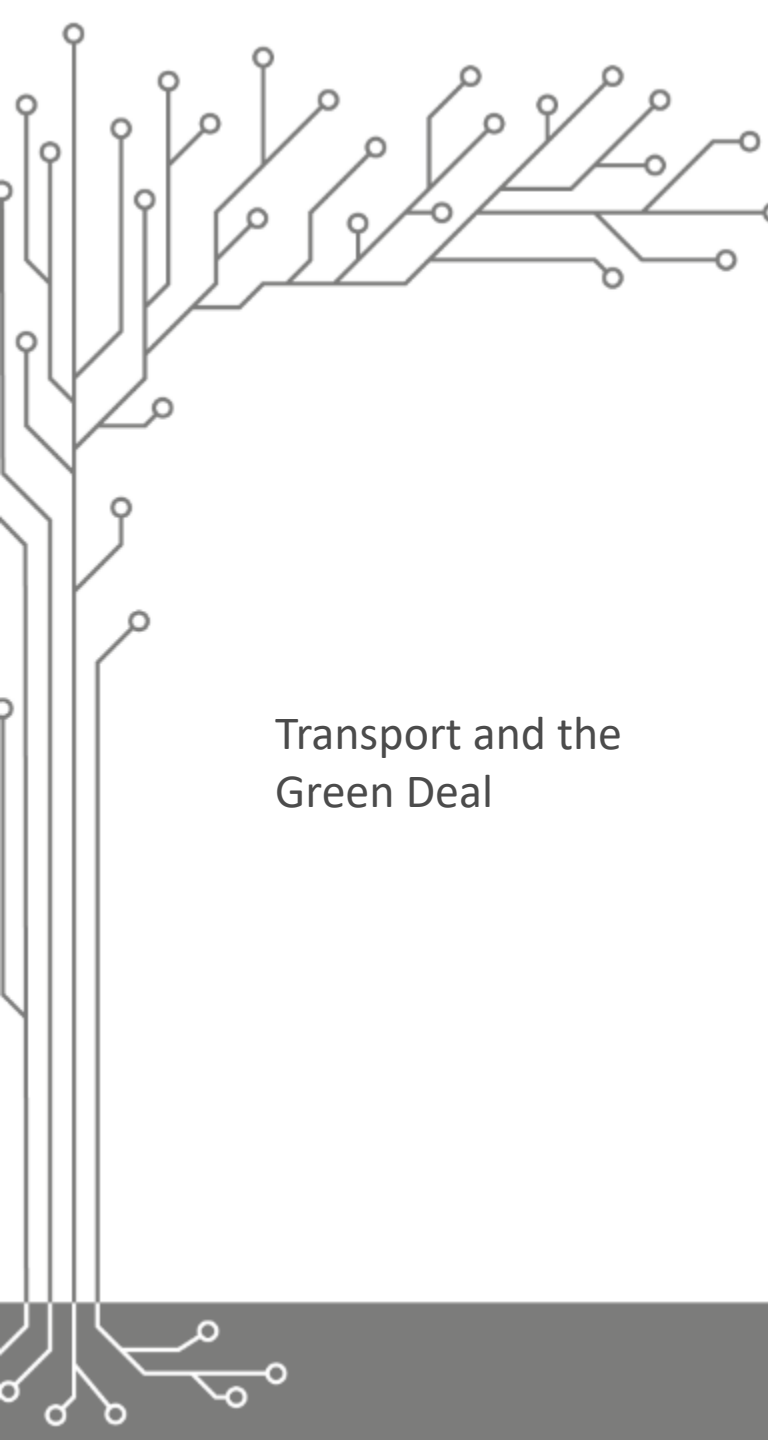

Deadline: 6 October 2021

Code: HORIZON-CL6-2021-
GOVERNANCE-01-17

Programme: Horizon Europe

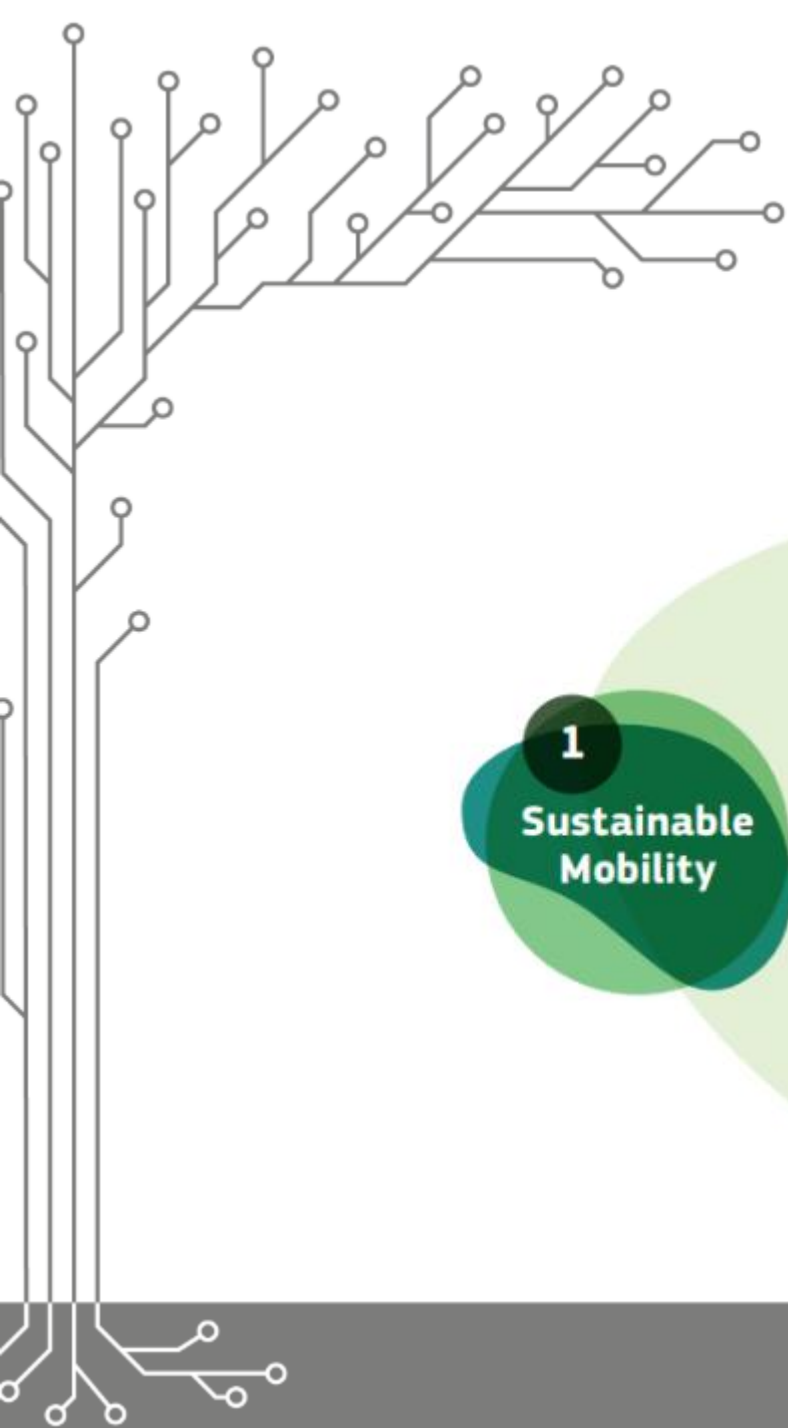

Action types: HORIZON-IA

HORIZON Innovation Actions

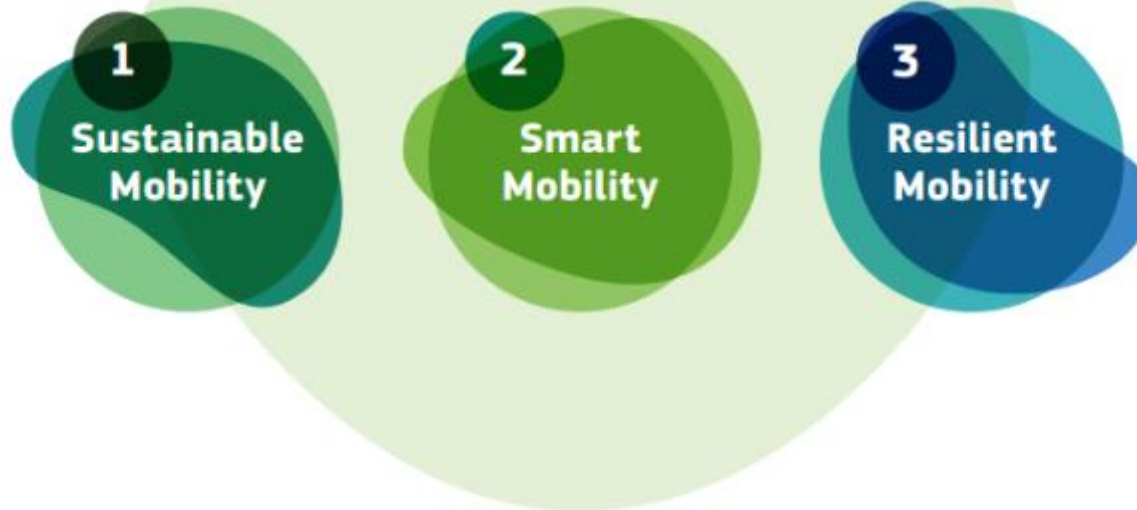

Transport and the Green Deal

OBJECTIVES

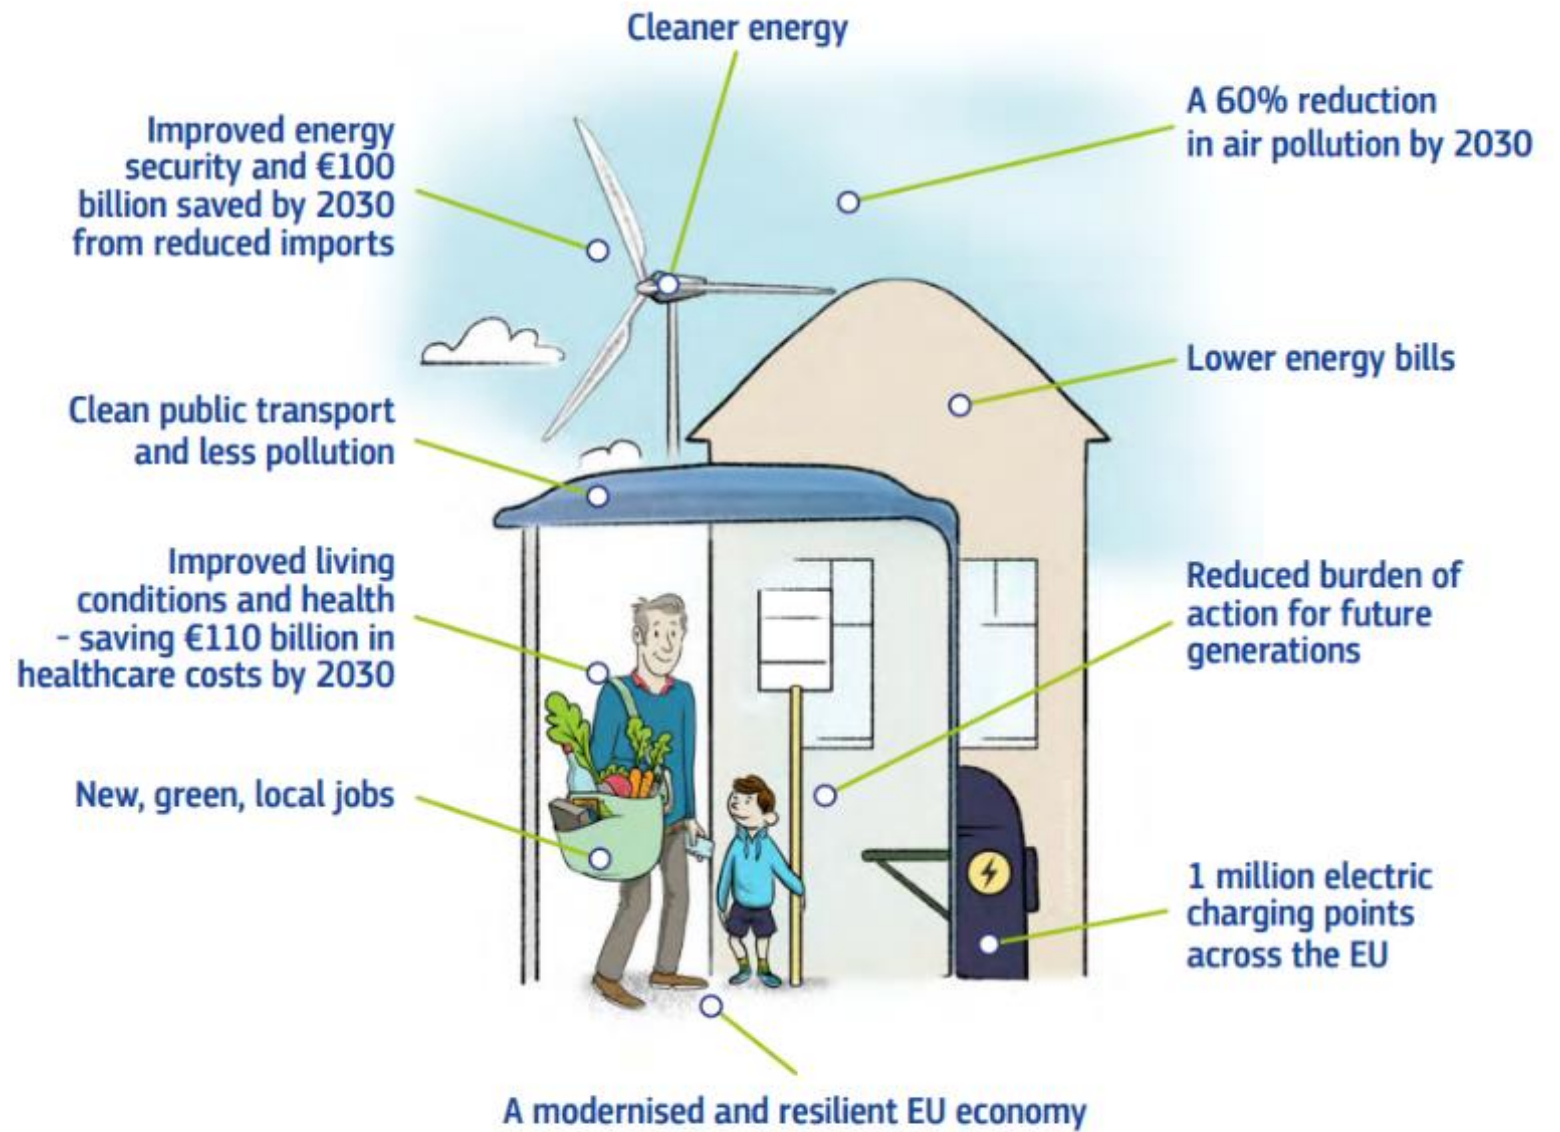

Unleash full potential
of **data**.

By 2030, integrated electronic
ticketing facilitates seamless multimodal
passenger transport.
Freight transport will be paperless.

By 2030, automated mobility
will be deployed on large scale.

Agriculture and the Green Deal

Protecting the
environment and oceans
with the Green Deal

Protect and restore our forests by

- Strictly protecting remaining **EU primary and old-growth forests**
- Establishing legally binding **nature restoration targets** for forests
- **Planting 3 billion** additional trees by 2030
- Creating **payment schemes** for forest owners and managers for the **provision of ecosystem services**

Ensure that forests are managed sustainably by

- Encouraging the **bio-economy** sector to embrace sustainable principles
- Promoting the uptake of **sustainably harvested wood** in the **construction sector**
- Promoting win-win measures for all in **sustainable forest management**

Understand what is happening in our forests by

- Improving the **monitoring of the state of EU forests** including through better remote sensing
- Ensuring Member States develop **Strategic Plans** for their forests
- Encouraging **citizen involvement** through Map-My-Tree, to keep track of the **3 billion trees** roadmap
- Creating an inclusive space for **all stakeholders to discuss**

Woody biomass should be used according to its highest economic and environmental added value in the following order of priorities:

Bioenergy in the total energy mix*

Bioenergy share in the renewable energy consumption*

*Eurostat 2019

Prohibit the sourcing of **biomass for energy production from primary forests, peatlands and wetlands**

No support for forest biomass in **electricity-only installations** as of 2026

Prohibit **national financial incentives for using saw or veneer logs, stumps and roots** for energy generation

Require **all biomass-based heat and power installations** to comply with minimum greenhouse gas saving thresholds

Apply the EU sustainability criteria to **smaller heat and power installations** (equal or above 5MW)

Improve the resilience of forests to climate change

Restore degraded ecosystems

Promote the bio-economy while preserving biodiversity

Increase carbon stored in soil and forests

Increase the use of long-lasting wood and bio-products

Support production of sustainable food

New target to restore and expand the EU's natural carbon sinks by 2030:

*CO₂eq
